

COVID-19 FORMAT CHANGES FOR ADMINISTRATORS

Dear Principal/Superintendent,

As an organization with a 42-year track record in working with schools we fully understand the complexities of what you are forced to deal with during and after this pandemic. As you are aware the level of anxiety, worry, pressure and uncertainty will be escalated as your students come back. There has never been a more important time to provide them with encouragement and confidence.

We have been in direct communication with Superintendents and Administrators from Dallas, New York, Chicago, Broward County Florida and several others throughout the country. We understand the numerous procedural and program changes you may need to implement.

Sports World has been actively developing alternative methods in order to continue to bring our Former Pro Athlete Speakers and their Message of Hope and Encouragement to your students. We are offering the following program formats.

- Pre-recorded professional video presentation from the Pro Speaker scheduled in your area
- On site presentations coordinated with your school media department and held in a safe location within the school for broadcast to the classroom or via smartboard applications.
- Our traditional on-site assembly program will be available in those districts where restrictions do not prohibit a physical appearance

We are aware that your district and community will have specific needs that unfold from this pandemic. Sports World is glad to discuss other formats such as Zoom video and other technology related solutions in order to bring The Message of Hope and Encouragement to your students as they return.

We strongly encourage you to contact us at info@sportsworld.org or by calling us at 800-832-6546 as soon as practical to discuss which of our program formats will best suit your school environment, and to schedule a date and time with our pro speaker(s) scheduled to be in your area.
